

Micros 2010

Upgrading your hardware

CORE

Simply swap the hard drive and your in business with CORE!

Simple hardware change-out of preconfigured hard disk drive breaths new life into the venerable Micros 2010 terminal.

These sturdy terminals were in need of serious software upgrades to meet current PCI [Payment Card Industry] standards of compliance as well as providing the business features needed for Palace Entertainment to grow their business

and meet ever present budget constraints.

The CORE system not only provided the needed Point of Sale functionality, but enhanced the operation with many added features that produced bottom line results.

Simple control tasks like Mini-Golf scorecard printing, coupon management, prize redemption, guest services, party planning - scheduling & group sales are now all managed from a single terminal.

PCI compliance issue were handled easily with the CORE system and audit probes have all been successful since implementation.

We saved Boomers! a fortune!

Redeploy the Micros
2010

We were able to redeploy existing hardware for Palace Entertainment's Boomers! saving them the cost of Micros Support fees, new SIM module costs, and extensive issues meeting numerous PCI compliance rules.
