

# Zone Play

a new form of time play

# CORE

Chicago Indoor Racing, a Dandy site, needed the ability to set groups of games (zones) in to free play for a period of time. The revenue model is the rental of a play room for a period of time.

To accommodate this need CORE created the ability to send specific commands that include “free play” for defined period of time, to one or more Command Zones.

Zones are established for the site and each game’s controller is set for the appropriate Zone on the “configure device”

## Add/Edit Device

<b>Name:</b>	<input type="text" value="RonExrF1"/>	<b>Type:</b>	<input type="text" value="MIDWAY"/>
<b>Mac:</b>	<input type="text" value="00.90.c2.c5.7c.f1"/>	<b>Device Family:</b>	<input type="text"/>
<b>Status:</b>	<input type="text" value="active"/>	<b>Manufacturer:</b>	<input type="text"/>
<b>Sw Version:</b>	<input type="text" value="merch304.bin"/>	<b>Zone:</b>	<input type="text" value="Floor1"/>
<b>Asset Tag:</b>	<input type="text"/>		

In the POS Item setup screen below, look to the left and observe the setting of duration: here 60 minutes is the run time for this sale Item, and on the right the Command Zone: here “Floor 1”. Create Items for each Zone and your reporting will show you not only what you made but what deals sold. If you set up your sale in group sales you will have great detail to up sell the customer the next time they buy.

Zone Time is just one of the time features of the CORE system:

We also have Multi-Time where the guest can add on additional attraction types to their time play. Like adding video games to a go-kart time pass, or laser tag to an arcade package.

To help improve your food and beverage offerings you can implement Freeze Time that allows you to stop time while the group or individual enjoys a meal or scheduled birthday party room.

Call one of our project manager - they all have operating experience and are eager to help you improve your revenue.
