## Overview:

Barcoded cards are issued at the kiosk or by your staff at a FastPAD+ point of sale station. The customer can view their account status at each card reader, the card issue and recharge kiosk or even online via the web. Customers may recharge on site by credit card or cash via the CORE kiosk without staff involvement and even online with a credit card. Remote payment brings a whole new level of income opportunity to your site. Students can call home and have their parents recharge their account. CORE's system provides complete reporting for the laundry and ancillary services paid for by card readers or point of sale including: vending machines, soap sales, drop-off services or other

cleaning charges, as well as ancillary income from game machines. The system is backed up nightly to our off site secure facilities for the ultimate in redundant data storage. Credit cards are processed to the site's bank account via the credit card clearinghouse of the your choice. CORE will administer all web services and credit card management via PCI-compliant servers located in Lenexa, KS. Client will be provided with secure access to their physical locations system and reporting 24/7.

The FastPAD+ POS consists of a stainless steel enclosure mounted to an IBM cash drawer and is equipped with a customer pole display, receipt printer, credit card reader, handheld barcode scanner and a CORE PAD reader. All CORE-supplied hardware is warranted for one year from the date of first commercial use (or 18 months from date of installation) and extended warranty is available. The FastPAD+ is easy to operate and can handle your dry cleaning and laundry services as well as direct interface with most serial weigh scales for automatic fee calculation for weight priced services. Staff logs into the system and every transaction is recorded to you can review operations remotely to confirm staff performance. You will know how much is in the till at any moment, either on-site or remotely. If your cell phone has a bar

A full function time clock and reporting system is built in to the CORE system and we can export your payroll records to ADP or others for check processing.

The system is capable of coupon management as well as discount management by group or membership. This means you can issue time limited coupons that can't be overridden by your staff, copied by your customers, or fraudulently duplicated in anyway.

The PAD card reader mounted on the laundry equipment is capable of multi-price selection where the guest could choose their price option. The PAD reader is of plastic and stainless steel construction for durability in all environments. We deploy swipe readers so than nothing can get stuck in the machine.

The CORE system includes a membership earnings program to encourage frequency of visit and increased purchases. The member ID is the same barcoded card as used for cashless payment. Members can even review their earnings on the card issue kiosk or online.

New customers may open an account online and are provided a print-at-home confirmation of their account which can be redeemed at the automated kiosk for an ID Card linked to their account.

The system can utilize most barcoded ID's issued by others, such as business and school issued ID's.

CORE has nearly 200 cashless sites in operation in North America with cashless laundry facilities on the cruise ships and resorts of the Walt Disney Company. CORE headquarters and servers are located in Lenexa, KS which is a suburb of Kansas City, with project management offices in New York, Dallas and Los Angeles.

We invite laundry distributors and service companies to become authorized distributors of our laundry and vending products.
